BOTOX® vs DYSPORT®

UNDERSTANDING THE KEY DIFFERENCES BETWEEN TWO POPULAR WRINKLE RELAXERS.

Both BOTOX® and DYSPORT® are FDA-approved neuromodulators used to relax facial muscles and soften dynamic expression lines. While similar in purpose, there are key differences that may influence which treatment is right for you.

COMPARISON TOPIC	BOTOX®	VS	DYSPORT®
1. WHAT IT IS	onabotulinumtoxinA, a botulinum toxin type A neuromodulator.		abobotulinumtoxinA, a botulinum toxin type A neuromodulator.
2. BEST KNOWN FOR	Precise placement and targeted correction.		Slightly broader spread and fast onset.
3. COMMON TREATMENT AREAS	Forehead lines, frown lines, crow's feet, bunny lines, brow lift, masseter/jawline.		Forehead lines, frown lines, crow's feet, larger treatment zones where more diffusion may be helpful.
4. DIFFUSION / SPREAD	Tends to stay more localized, ideal for precise areas.		Tends to diffuse a bit more broadly, ideal for larger areas.
5. ONSET	Often starts working in about 3–7 days.		Often starts working in about 2–3 days.
6. FULL RESULTS	Typically seen in about 10–14 days.		Typically seen in about 7–14 days.
7. DURATION	Results often last about 3–4 months.		Results often last about 3–4 months.
8. DOSING	Measured in Botox units.		Measured differently; common conversion is about 2.5 to 3 Dysport units for every 1 Botox unit.
9. APPOINTMENT TIME	Quick in-office treatment, often around 10–20 minutes.		Quick in-office treatment, often around 10–20 minutes.
10. DOWNTIME / RECOVERY	Minimal downtime; many patients return to normal activities the same day.		Minimal downtime; many patients return to normal activities the same day.
11. POSSIBLE SIDE EFFECTS	Temporary redness, swelling, bruising, tenderness, or headache may occur.		Temporary redness, swelling, bruising, tenderness, or headache may occur.
12. IDEAL CHOICE / QUICK TAKEAWAY	Great when precision is the priority.		Great when faster onset or a broader spread is desired.

WHICH IS RIGHT FOR YOU?

CHOOSE BOTOX®
When precision is the priority.

OR

CHOOSE DYSPORT®
When faster onset or broader spread is preferred.

Your provider will help you choose the best option based on your anatomy, goals, and treatment areas.
